

# Seong-Jun Kang, Ph.D.

Immunologist working in multiplexed protein and RNA measurement, in situ and at single-cell scale

Postdoctoral applicant · Boston, MA

101 Canal Street

Boston, MA 02114

(551) 239-0341

[sjkang89@gmail.com](mailto:sjkang89@gmail.com)

## PROFESSIONAL STATUS

I measure molecular composition in intact samples, one unit at a time, and I check that the result holds on data the model has not seen. The unit has been a cell or a tissue region.

## RESEARCH OBJECTIVE

to carry multiplexed in situ measurement into new model systems, and to keep donor and batch structure separated from biology while doing it.

## SCIENTIFIC INTERESTS

multiplexed protein and RNA detection in situ (GeoMx, Olink, MACSima, 24-color flow); binding measurement by SPR and ELISA; consensus NMF for cell-state programs; isoform-level calling from short reads; multi-donor study design; calibrated models checked on held-out data.

## EDUCATION

### DEGREES

|                           |                                                                                                                                                                                                                                         |

## ■ TECHNICAL SKILLS

|                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|-------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Binding &amp; protein interaction</b>  | <b>Surface plasmon resonance (Biacore)</b> run hands-on for antibody lead work: association and dissociation rates, affinity ranking across a candidate panel, receptor-blocking confirmation, and human / non-human-primate cross-reactivity. <b>ELISA</b> -based affinity and epitope analysis; competition binding. Antibody lead selection and optimization from candidate panel to registered patent. Functional validation of a peptide inhibitor of calcineurin in primary human T cells (CABIN1 core peptide, <i>Exp Mol Med</i> 2022). |
| <b>Program &amp; external execution</b>   | CRO and core-facility work from study design and placement through data delivery and go/no-go calls; assay conditions specified to the vendor; regulatory documentation for a therapeutic antibody program; funder milestones and reporting; multi-site sample QC across a 700-donor collection.                                                                                                                                                                                                                                                |
| <b>Immunological assays</b>               | High-dimensional flow cytometry (panels up to 24 markers); multiplex panel design; 10-color 6-way FACS. <b>Olink</b> targeted plasma proteomics (immune & neurology panels). Primary human T-cell isolation, expansion and functional assays; monocyte and dendritic-cell differentiation; mesenchymal stem cell culture. Enzymatic tissue digestion, Percoll enrichment, cell and nucleus isolation.                                                                                                                                           |
| <b>Single-cell / spatial / multi-omic</b> | scRNA-seq, scTCR-seq, snRNA/snATAC; 10x 5'/3' library generation and <b>10x Chromium Connect</b> automated preparation. <b>Seurat</b> , <b>Scanpy</b> , <b>Squidpy</b> , <b>Monocle3</b> , <b>CellChat/NicheNet</b> ; scVI/scANVI, batch integration, <b>consensus NMF</b> ; Milo KNN-graph differential abundance, GLIPH, InferCNV. Custom UMI-aware, BAM-level isoform analysis code (Python). Spatial: <b>GeoMx DSP</b> run end to end, <b>Visium</b> , <b>MACSima</b> cyclic multiplexed immunofluorescence.                                |
| <b>Computational</b>                      | Python: scikit-learn, XGBoost/LightGBM/CatBoost, <b>PyTorch</b> ; AUC-validated classifiers held out on independent cohorts; multimodal deep-learning integration (imaging + transcriptomic + clinical). Linux servers · R/RStudio · Git-based reproducible analysis.                                                                                                                                                                                                                                                                           |
| <b>Microscopy &amp; animal models</b>     | Spinning-disk confocal (Nikon CSU-W1 SORA), point-scanning confocal (Leica SP8), two-photon; IHC/IF (frozen & FFPE) with quantitative image analysis. Non-human primates across three species (rhesus, cynomolgus, marmoset), including EAE and islet-transplantation studies; mouse immune profiling.                                                                                                                                                                                                                                          |

- 2022** Sangho Lee, Han-Teo Lee, Young Ah Kim, Il-Hwan Lee, **Seong-Jun Kang**, Kyeongpyo Sim, Chung-Gyu Park, Kyungho Choi, Hong-Duk Youn. **"The optimized core peptide derived from CABIN1 efficiently inhibits calcineurin-mediated T-cell activation."** *Experimental & Molecular Medicine*. IF 12.8  
*Co-author. A CABIN1-derived core peptide blocks the calcineurin-CABIN1 interaction and inhibits calcineurin-mediated T-cell activation. My part was the T-cell functional validation.*
- 
- 2021** So Hee Hong, Hyun Je Kim, **Seong-Jun Kang**, Chung-Gyu Park. **"Novel Immunomodulatory Approaches for Porcine Islet Xenotransplantation."** *Current Diabetes Reports*. IF 4.2 [Download PDF](#)  
*Co-author. Review of novel immunomodulatory strategies for porcine islet xenotransplantation.*
- 
- 2020** Sunho Lee, Sueon Kim, Hyunwoo Chung, Ji Hwan Moon, **Seong-Jun Kang**, Chung-Gyu Park. **"Mesenchymal stem cell-derived exosomes suppress proliferation of T cells by inducing cell cycle arrest through p27kip1/Cdk2 signaling."** *Immunology Letters*. IF 4.4  
*Co-author. MSC-derived exosomes suppress T-cell proliferation through p27kip1/Cdk2-mediated cell-cycle arrest.*
- 
- 2019** Hyun Je Kim, Ji Hwan Moon, Hyunwoo Chung, Jun-Seop Shin, Bongi Kim, Jong Min Kim, Jung-Sik Kim, Il-Hee Yoon, Byoung-Hoon Min, **Seong-Jun Kang**, Yong-Hee Kim, Kyuri Jo, Joungmin Choi, Heejoon Chae, Won Woo Lee, Sun Kim, Chung-Gyu Park. **"Bioinformatic analysis of peripheral blood RNA-sequencing sensitively detects the cause of late graft loss following overt hyperglycemia in pig-to-non-human primate islet xenotransplantation."** *Scientific Reports*. IF 4.6  
*Co-author. Bioinformatic analysis of peripheral-blood RNA-seq to detect causes of late graft loss in pig-to-NHP islet xenotransplantation.*
- 
- 2018** Byoung-Hoon Min, Jun-Seop Shin, Jong-Min Kim, **Seong-Jun Kang**, Hyun-Je Kim, Il-Hee Yoon, Su-Kyoung Park, Ji-won Choi, Min-Suk Lee, Chung-Gyu Park. **"Delayed revascularization of islets after transplantation by IL-6 blockade in pig-to-non-human primate islet xenotransplantation model."** *Xenotransplantation*. IF 3.9  
*Co-author. IL-6 blockade delays islet revascularization in a pig-to-NHP islet xenotransplantation model.*

2018

Jun-Seop Shin, Jong-Min Kim, Byoung-Hoon Min, Il Hee Yoon, Hyun Je Kim, Jung-Sik Kim, Yong-Hee Kim, **Seong-Jun Kang**, Jiyeon Kim, Hee-Jung Kang, Dong-Gyun Lim, Eung-Soo Hwang, Jongwon Ha, Sang-Joon Kim, Wan Beom Park, Chung-Gyu Park. "Pre-clinical results in pig-to-non-human primate islet xenotransplantation using anti-CD40 antibody (2C10R4)-based immunosuppression." *Xenotransplantation*. IF 3.9

Co-author. Pre-clinical pig-to-NHP islet xenotransplantation with anti-CD40 (2C10R4)-based immunosuppression.

---

2018

Jong-Min Kim, Jun-Seop Shin, Byoung-Hoon Min, Il Hee Yoon, **Seong-Jun Kang**, Won-Young Jeong, Sang-Joon Kim, Chung-Gyu Park. "Pre-Clinical Results of Islet Allo-Transplantation Using JAK Inhibitor as Replacement for Tacrolimus in Cynomolgus Monkeys." *Transplantation*. IF 6.2

Co-author. Pre-clinical islet allo-transplantation using a JAK inhibitor in place of tacrolimus in cynomolgus macaques.

---

2018

Jung-Sik Kim, Hyunwoo Chung, Nari Byun, **Seong-Jun Kang**, Sunho Lee, Jun-Seop Shin, Chung-Gyu Park. "Construction of EMSC-islet co-localizing composites for xenogeneic porcine islet transplantation." *Biochemical and Biophysical Research Communications*. IF 3.1

Co-author. Engineered EMSC-islet co-localizing composites for xenogeneic porcine islet transplantation.

MANUSCRIPTS IN PREPARATION

2026

Kangsan Roh\*, Sabyasachi Das\*, **Seong-Jun Kang**, Olga Barreiro, Rodrigo Javier Gonzalez, Timothy P. Padera, Shraddha Shirguppe, Ahlim Lee, Youngju Song, Pazhanichamy Kalailingam, Claire E. Fong, Aarushi Gandhi, Meehyun Kim, Diana Tambala, Adam Vernon Crain, Casey A. Maguire, Ulrich H. Von Andrian, Christian L. Lino Cardenas, Sekeun Kim, Benjamin P. Kleinstiver, Mark E. Lindsay, Patricia L. Musolino, Rajeev Malhotra. "In-vivo base editing of ACTA2 R179H restores lymphatic function and immune cell homeostasis in a murine model of Multisystemic Smooth Muscle Dysfunction Syndrome (MSMDS)." in preparation

Co-author (immunology). Performed the plasma proteomics analysis (Olink immune & neurology panels, 12 patients vs 6 controls), showing broad down-regulation of lymphoid regulators (LTβR, BAFF) and leukocyte-adhesion molecules, with dimensionality reduction separating patients from controls; complemented by flow-cytometry immunophenotyping of lymph-node leukocytes (germinal-center B cells GL7\*B220+).

| Ministry of Science and ICT (MSIT) · Bio & Medical Technology Development Program | Establishing a meta-platform for discovering molecular targets by building a multi-layered immune-disease single-cell map (A9-22-1-05; SCAID, Single-cell Atlas for Immunological Disease) | 2022-2028<br>(3+3) | ~\$1.6M      | Participated in proposal writing (>30%)                   |
| Ministry of Education (MOE) & Ministry of Science and ICT (MSIT)                  | Laboratory-Specialized Tech-Transfer & R&BD Grant                                                                                                                                          | 2020-2021          | ~\$40,000    | Grant writing, experimental design & technical validation |

All grants were held by the institutional Principal Investigator (Ph.D. advisor at SNU; company CEO/CSO at PB Immune Therapeutics); the listed roles reflect the applicant's contribution to proposal writing and project execution, **not as PI**. Budgets converted at ≈ ₩1,400 / USD.

RESEARCH INTERESTS

- Reading immune cell state from incomplete single-cell data.** Cell-state calling under ambiguity, isoform and transcript resolution from short reads, and embedding representations of cells, with calibrated confidence.
- Multi-modal integration of molecular identity.** Transcriptome, chromatin, spatial, and proteome into cell-state-resolved models.
- Neuro-immune interactions in neurodegeneration.** T cells, microglia, and the blood-CSF barrier in Alzheimer's and related disease; ligand-receptor cross-talk and clonal/repertoire structure.
- Building and checking computational analysis paths.** Custom callers, reproducible end-to-end analysis code, and comparison against domain ground truth.
- Atlas-scale single-cell analysis across diseases and species.** Large multi-donor atlases (SCAID), cross-disease meta-analysis, and NHP-to-human translation.
